EDUCATION

University of Illinois at Urbana-Champaign Aug. 2017 — Present
Ph.D. Candidate in Electrical and Computer Engineering

University of Illinois at Urbana-Champaign Jan. 2016 — Dec. 2017
M.S. in Applied Mathematics

University of Illinois at Urbana-Champaign Aug. 2015 — Aug. 2017
M.S. in Electrical and Computer Engineering

Tsinghua University Sept. 2011 — Jul. 2015
B.S. in Automation (with honor) & **Dual Degree** in Economics

RESEARCH INTERESTS

My research interests lie in the intersection of *control* and *reinforcement learning*, especially in the settings of *multi-agent* systems and *robust control*; with applications in (networked) cyber-physical systems including smart grid, robotics, and transportation systems. I resort to mathematical tools from the areas of Control Theory, Game Theory, Operations Research, and Probability to develop provably convergent and efficient algorithms. Broadly speaking, my research aim to lay theoretical foundations for the learning algorithms that address sequential-decision-making problems in controls and game theory.

RESEARCH EXPERIENCES

Learning in robust control
Department of ECE & CSL, UIUC *May 2019 — Present*

- Investigate the *landscape* of a class of robust control problems, including risk-sensitive control, disturbance attenuation, and mixed $\mathcal{H}_2/\mathcal{H}_\infty$ control synthesis, from a *policy optimization* perspective
- Analyze the *global convergence* and *sample complexity* of policy optimization algorithms for these non-convex problems, with *robust-on-the-fly* guarantees
- The theory also places the popular scheme of *robust adversarial RL* (RARL) under a solid theoretical footing, through the lens of robust control theory

Non-cooperative multi-agent RL in dynamic/Markov games
Department of ECE & CSL, UIUC *Dec. 2018 — Present*

- Develop provably *convergent* and *efficient* algorithms for several fundamental non-cooperative multi-agent RL (MARL) settings
- Establish *minimax-optimal* sample complexity guarantees for model-based MARL approach in zero-sum Markov games; establish *global convergence* and sample complexity of policy optimization methods in zero-sum linear quadratic games
- Also investigate the settings of *inverse RL* with asymmetric information, *team-to-team* competition, robust MARL with *model-uncertainty*, and *decentralized* self-interested agents

Cooperative multi-agent RL with networked agents
Department of ECE & CSL, UIUC *Sept. 2017 — Present*

- Develop *provably convergent* MARL algorithms for *decentralized* MARL with *networked* agents

· Also investigate the extensions to *batch/offline RL* settings, large-population/*mean-field* regimes, and *partial-observable* settings

Distributed control and operation in cyber-physical system
Department of ECE, UIUC *Sept. 2015 — Aug. 2017*

· Develop distributed algorithms for voltage-VAR control in smart grid distribution networks, under *limited communication links* using *game-theoretic* approaches
· Develop dynamic pricing algorithms for the charging of electrical unmanned aerial vehicles in transportation networks that are coupled with power networks
· Develop improved parameter estimation framework for load modeling in distribution networks

On the performance of map-aware cooperative localization June 2014 — May 2015
LIDS, MIT & Tsinghua University *Advisors: Prof. Moe Z. Win & Prof. Yuan Shen*

· Characterize the fundamental limits of localization accuracy by the information-theoretic bounds, i.e., Ziv-Zakai and Weiss-Weinstein bounds, for map-aware cooperative localization

OTHER RESEARCH EXPERIENCES

Visiting Graduate Student	Simons Institute, UC Berkeley (virtual)	Aug. 2020 — Dec. 2020
Research Scientist Intern	Amazon AWS AI Labs, Seattle, WA	May 2019 — Aug. 2019
Visiting Fellowship	Army Research Lab. (ARL), Adelphi, MD	Jun. 2018 — Aug. 2018
Research Scientist Intern	Nation. Renew. Energy Lab. (NREL), CO	Jun. 2016 — Sept. 2016

TEACHING EXPERIENCES

Teaching Assistant	ECE 543 Statistical Learning Theory by Prof. R. Srikant	Spring 2020

PATENTS

U.S. Patent No. 908486 Robust Actor/Critic Multi-Agent RL for Mobile Robotics Applications

AWARDS & HONORS

- Kuck Computational Science & Engineering Scholarship, UIUC 2020
- Hong, McCully, and Allen Fellowship (**$12000**), UIUC 2018 & 2019 & 2020
- YEE Fellowship Award, College of Engineering, UIUC 2020
- NeurIPS Travel Award 2019
- CDC Student Travel Award 2019 & 2020
- Mavis Future Faculty Fellows (MF3), UIUC 2019
- ICML Travel Award 2018
- James M. Henderson Fellowship, UIUC 2016
- Beijing Outstanding Undergraduate Thesis 2015
- National Scholarship (**top 3%**), Tsinghua University 2014
- **Meritorious Winner** 2014 Mathematical Contest in Modeling 2014
- **First Prize** in 34th Challenge Cup of Tsinghua University 2014
- **Third place** in competition of Adult-Size Group in RoboCup 2013
- Comprehensive First-Class Scholarship of Tsinghua University (**top 5%**) 2012 & 2013
- **First Prize** of National Physics Olympiad, with Pre-Admission to Tsinghua 2011

PROFESSIONAL SERVICES & ACTIVITIES

- Reviewer for *ICML*, *NeurIPS*, *AAAI*, *Mathematical Programming, IEEE Trans. Automatic Control (TAC), Automatica, IEEE Journal of Selected Topics in Signal Processing (JSTSP), IEEE Trans. Smart Grid (TSG), IEEE Trans. Power Systems (TPS), IEEE Control Systems Letters (L-CSS), IEEE Communications Letters (CL), IEEE American Control Conf. (ACC), IEEE Control and Decision Conf. (CDC), IEEE Intl. Conf. on Communications (ICC).*
- Organizer of the invited sessions *Machine Learning in Complex Networks* at *IEEE Control and Decision Conf. (CDC)*, 2018, 2019
- President of Tsinghua University Alumni Association (THU-AA) in UIUC Sept. 2019 — Present
- Committee of the 8th *IEEE Power and Energy Conf. at Illinois (PECI)* April 2016 — Feb. 2017
- Vice-President of the Student Union of the Dept. of Automation Aug. 2013 — Aug. 2014
