EDUCATION

University of Illinois at Urbana-Champaign Ph.D. Candidate in Electrical and Computer Engineering	Aug. 2017 — Present
University of Illinois at Urbana-Champaign M.S. in Applied Mathematics	Jan. 2016 — Dec. 2017
University of Illinois at Urbana-Champaign M.S. in Electrical and Computer Engineering	Aug. 2015 — Aug. 2017
Tsinghua University B.S. in Automation (with honor) & Dual Degree in Economics	Sept. 2011 — Jul. 2015

RESEARCH INTERESTS

My research interests lie in the intersection of *control theory*, *game theory*, and *machine learning*, especially *reinforcement learning*, especially in *multi-agent* and *safety-critical* systems; with applications in intelligent and distributed cyber-physical systems, e.g., robotics, smart grid, and transportation systems. I resort to mathematical tools from the areas of Control Theory, Game Theory, Operations Research, and Probability Theory to develop *provably convergent* and *efficient* algorithms. Broadly speaking, the primary goal of my research is to lay theoretical foundations for the learning algorithms and systems that address (*data-driven*) *sequential-decision-making* problems in game theory and control theory, particularly in the presence of multiple decision-makers, towards *large-scale* and *reliable* autonomy.

RESEARCH EXPERIENCES

Reinforcement learning (RL) in robust control

Department of ECE & CSL, UIUC

May 2019 — Present

- Investigate the *landscape* of a class of robust control problems, including risk-sensitive control, \mathcal{H}_∞ -optimal control, and mixed $\mathcal{H}_2/\mathcal{H}_\infty$ control synthesis, from a *policy optimization* perspective
- Analyze the *global convergence* and *sample complexity* of policy optimization algorithms for these non-convex problems, with *robust-on-the-fly* guarantees
- The theory also places the popular scheme of *robust adversarial RL* (RARL) under a solid theoretical footing, through the lens of robust control theory

Non-cooperative multi-agent RL in dynamic/Markov games

Department of ECE & CSL, UIUC

Dec. 2018 — Present

- Develop provably *convergent* and *efficient* algorithms for several fundamental non-cooperative multi-agent RL (MARL) settings
- Establish *minimax-optimal* sample complexity guarantees for model-based MARL approach in zero-sum Markov games; establish *global convergence* and sample complexity of policy optimization methods in zero-sum linear quadratic games
- Investigate the settings of *inverse RL* with asymmetric information, robust MARL with *model-uncertainty*, and *decentralized* self-interested agents

Cooperative multi-agent RL with networked agents

Department of ECE & CSL, UIUC

Sept. 2017 — Present

- Develop *provably convergent* MARL algorithms for *decentralized* MARL with *networked* agents
- Investigate the extensions to *batch/offline RL* settings, large-population/*mean-field* regimes, and *partial-observable* settings

Distributed control and operation in cyber-physical systems

Department of ECE, UIUC

Sept. 2015 — Aug. 2017

- Developed distributed algorithms for voltage-VAR control in smart grid distribution networks, under *limited communication links* using *game-theoretic* approaches
- Developed dynamic pricing algorithms for the charging of electrical unmanned aerial vehicles in transportation networks that are coupled with power networks
- Developed improved parameter estimation framework for load modeling in distribution networks

On the performance of map-aware cooperative localization

LIDS, MIT & Tsinghua University

June 2014 — May 2015

- Characterized the fundamental limits of localization accuracy using the information-theoretic bounds, i.e., Ziv-Zakai and Weiss-Weinstein bounds, for map-aware cooperative localization

OTHER RESEARCH EXPERIENCES

Visiting Graduate Student	Simons Institute, UC Berkeley (virtual)	Aug. 2020 — Dec. 2020
Research Scientist Intern	Amazon AWS AI Labs, Seattle, WA	May 2019 — Aug. 2019
Visiting Fellowship	Army Research Lab. (ARL), Adelphi, MD	Jun. 2018 — Aug. 2018
Research Scientist Intern	Nation. Renew. Energy Lab. (NREL), CO	Jun. 2016 — Sept. 2016

TEACHING EXPERIENCES

Teaching Assistant	ECE 543 Statistical Learning Theory by Prof. R. Srikant	Spring 2020
---------------------------	---	-------------

PATENTS

U.S. Patent No. 908486	Robust Actor/Critic Multi-Agent RL for Mobile Robotics Applications
------------------------	---

AWARDS & HONORS

-
- | | |
|--|--------------------|
| · Simons-Berkeley Research Fellowship, Simons Institute & UC Berkeley | 2022 |
| · Kuck Computational Science & Engineering Scholarship, UIUC | 2020 |
| · Hong, McCully, and Allen Fellowship (\$12000), UIUC | 2018 & 2019 & 2020 |
| · YEE Fellowship Award, College of Engineering, UIUC | 2020 |
| · NeurIPS Travel Award | 2019 |
| · CDC Student Travel Award | 2019 & 2020 |
| · Mavis Future Faculty Fellows (MF3), UIUC | 2019 |
| · ICML Travel Award | 2018 |
| · James M. Henderson Fellowship, UIUC | 2016 |
| · Beijing Outstanding Undergraduate Thesis | 2015 |
| · National Scholarship (top 3%), Tsinghua University | 2014 |
| · Meritorious Winner 2014 Mathematical Contest in Modeling | 2014 |
| · First Prize in 34th Challenge Cup of Tsinghua University | 2014 |
| · Third place in competition of Adult-Size Group in RoboCup | 2013 |
| · Comprehensive First-Class Scholarship of Tsinghua University (top 5%) | 2012 & 2013 |
| · First Prize of National Physics Olympiad, with Pre-Admission to Tsinghua University | 2011 |

PROFESSIONAL SERVICES & ACTIVITIES

-
- Co-organizer of the online seminar series *Games, Decisions & Networks*

- Reviewer for *ICML*, *NeurIPS*, *AAAI*, *Mathematical Programming*, *IEEE Trans. Automatic Control (TAC)*, *Automatica*, *IEEE Journal of Selected Topics in Signal Processing (JSTSP)*, *IEEE Trans. Smart Grid (TSG)*, *IEEE Trans. Power Systems (TPS)*, *IEEE Control Systems Letters (L-CSS)*, *IEEE Communications Letters (CL)*, *System & Control Letters*, *IEEE American Control Conf. (ACC)*, *IEEE Control and Decision Conf. (CDC)*, *IEEE Intl. Conf. on Communications (ICC)*
- Organizer of the invited sessions *Machine Learning in Complex Networks* at *IEEE Control and Decision Conf. (CDC)*, 2018, 2019
- President of *Tsinghua University Alumni Association (THU-AA)* in UIUC Sept. 2019 — Present
- Committee of the 8th *IEEE Power and Energy Conf. at Illinois (PECI)* April 2016 — Feb. 2017
- Vice-President of the *Student Union* of the Dept. of Automation Aug. 2013 — Aug. 2014
