1308 W Main St., Coordinated Science Laboratory, Room 360 \diamond Urbana, IL 61801

EDUCATION

University of Illinois at Urbana-Champaign Ph.D. Candidate in Electrical and Computer Engineering	Aug. 2017 — Present
University of Illinois at Urbana-Champaign M.S. in Applied Mathematics	Jan. 2016 — Dec. 2017
University of Illinois at Urbana-Champaign M.S. in Electrical and Computer Engineering	Aug. 2015 — Aug. 2017
Tsinghua University B.S. in Automation (with honor) & Dual Degree in Economics	Sept. 2011 — Jul. 2015

RESEARCH INTERESTS

My research interests lie in the intersection of *reinforcement learning* and *control*, especially in the settings of *multi-agent* and *safety-critical* systems; with applications in intelligent and distributed cyber-physical systems including robotics, smart grid, and transportation systems. I resort to mathematical tools from the areas of Control Theory, Game Theory, Operations Research, and Probability Theory to develop provably convergent and efficient algorithms. Broadly speaking, the primary goal of my research is to lay theoretical foundations for the learning algorithms and systems that address (*data-driven*) *sequential-decision-making* problems in control and game theory, particularly in the presence of multiple decision-makers, towards *large-scale* and *reliable* autonomy.

RESEARCH EXPERIENCES

Learning in robust control

Department of ECE & CSL, UIUC

May 2019 — Present

- Investigate the *landscape* of a class of robust control problems, including risk-sensitive control, \mathcal{H}_∞ -optimal control, and mixed $\mathcal{H}_2/\mathcal{H}_\infty$ control synthesis, from a *policy optimization* perspective
- Analyze the *global convergence* and *sample complexity* of policy optimization algorithms for these non-convex problems, with *robust-on-the-fly* guarantees
- The theory also places the popular scheme of *robust adversarial RL* (RARL) under a solid theoretical footing, through the lens of robust control theory

Non-cooperative multi-agent RL in dynamic/Markov games

Department of ECE & CSL, UIUC

Dec. 2018 — Present

- Develop provably *convergent* and *efficient* algorithms for several fundamental non-cooperative multi-agent RL (MARL) settings
- Establish *minimax-optimal* sample complexity guarantees for model-based MARL approach in zero-sum Markov games; establish *global convergence* and sample complexity of policy optimization methods in zero-sum linear quadratic games
- Investigate the settings of *inverse RL* with asymmetric information, robust MARL with *model-uncertainty*, and *decentralized* self-interested agents

Cooperative multi-agent RL with networked agents

Department of ECE & CSL, UIUC

Sept. 2017 — Present

- Develop *provably convergent* MARL algorithms for *decentralized* MARL with *networked* agents
- Investigate the extensions to *batch/offline RL* settings, large-population/*mean-field* regimes, and *partial-observable* settings

Distributed control and operation in cyber-physical systems

Department of ECE, UIUC

Sept. 2015 — Aug. 2017

- Developed distributed algorithms for voltage-VAR control in smart grid distribution networks, under *limited communication links* using *game-theoretic* approaches
- Developed dynamic pricing algorithms for the charging of electrical unmanned aerial vehicles in transportation networks that are coupled with power networks
- Developed improved parameter estimation framework for load modeling in distribution networks

On the performance of map-aware cooperative localization

LIDS, MIT & Tsinghua University

June 2014 — May 2015

- Characterized the fundamental limits of localization accuracy using the information-theoretic bounds, i.e., Ziv-Zakai and Weiss-Weinstein bounds, for map-aware cooperative localization

OTHER RESEARCH EXPERIENCES

Visiting Graduate Student	Simons Institute, UC Berkeley (virtual)	Aug. 2020 — Dec. 2020
Research Scientist Intern	Amazon AWS AI Labs, Seattle, WA	May 2019 — Aug. 2019
Visiting Fellowship	Army Research Lab. (ARL), Adelphi, MD	Jun. 2018 — Aug. 2018
Research Scientist Intern	Nation. Renew. Energy Lab. (NREL), CO	Jun. 2016 — Sept. 2016

TEACHING EXPERIENCES

Teaching Assistant	ECE 543 Statistical Learning Theory by Prof. R. Srikant	Spring 2020
--------------------	---	-------------

PATENTS

U.S. Patent No. 908486	Robust Actor/Critic Multi-Agent RL for Mobile Robotics Applications
------------------------	---

AWARDS & HONORS

· Kuck Computational Science & Engineering Scholarship, UIUC	2020
· Hong, McCully, and Allen Fellowship (\$12000), UIUC	2018 & 2019 & 2020
· YEE Fellowship Award, College of Engineering, UIUC	2020
· NeurIPS Travel Award	2019
· CDC Student Travel Award	2019 & 2020
· Mavis Future Faculty Fellows (MF3), UIUC	2019
· ICML Travel Award	2018
· James M. Henderson Fellowship, UIUC	2016
· Beijing Outstanding Undergraduate Thesis	2015
· National Scholarship (top 3%), Tsinghua University	2014
· Meritorious Winner 2014 Mathematical Contest in Modeling	2014
· First Prize in 34th Challenge Cup of Tsinghua University	2014
· Third place in competition of Adult-Size Group in RoboCup	2013
· Comprehensive First-Class Scholarship of Tsinghua University (top 5%)	2012 & 2013
· First Prize of National Physics Olympiad, with Pre-Admission to Tsinghua University	2011

PROFESSIONAL SERVICES & ACTIVITIES

- Co-organizer of the online seminar series *Games, Decisions, and Networks* (starting in Jan. 2021)
- Reviewer for *ICML*, *NeurIPS*, *AAAI*, *Mathematical Programming*, *IEEE Trans. Automatic Control (TAC)*, *Automatica*, *IEEE Journal of Selected Topics in Signal Processing (JSTSP)*, *IEEE Trans. Smart Grid (TSG)*, *IEEE Trans. Power Systems (TPS)*, *IEEE Control Systems Letters (L-CSS)*, *IEEE Communications Letters (CL)*, *System & Control Letters*, *IEEE American Control Conf. (ACC)*, *IEEE Control and Decision Conf. (CDC)*, *IEEE Intl. Conf. on Communications (ICC)*
- Organizer of the invited sessions *Machine Learning in Complex Networks* at *IEEE Control and Decision Conf. (CDC)*, 2018, 2019
- President of *Tsinghua University Alumni Association (THU-AA)* in UIUC Sept. 2019 — Present
- Committee of the 8th *IEEE Power and Energy Conf. at Illinois (PECI)* April 2016 — Feb. 2017
- Vice-President of the *Student Union* of the Dept. of Automation Aug. 2013 — Aug. 2014
